Category 5/5e Surface Jack

(with Auto Dust Cover)

3003AD-8

Duplex type: Elegantly designed and can accommodate two voices or data ports.

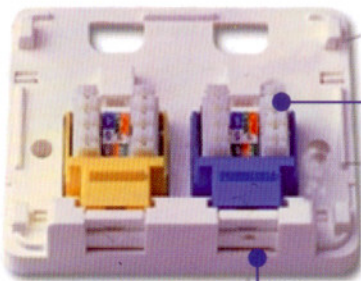

The duplex surface jack can be mounted easily on most walls, floors and office furniture using screws or double sided adhesive tape. (Cable tie & cable tie holder included)

3002A-8

Single type: accommodates one telecommunication data port.

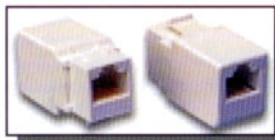

Installation is fast and easy with 110-type insulation displacement connector (IDC).

Keystone Jack: Using 90° degree Keystone Jack as a connector between cable and Patch cord

Auto Dust Cover: Prevents dust coming in when the jack is not in use

Category 5/5e Line Coupler

210-C5-2

(see picture below for more details)

Our small Category 5/5e Keystone Coupler is nicely designed to snap in and out of the Wall Plate, Patch Panel. Comes with T568A and T568B wiring and complies fully with EIA/TIA TSB 67 specification for attenuation, return loss, and near-end-crosstalk for any pair combination up to 100 MHz.

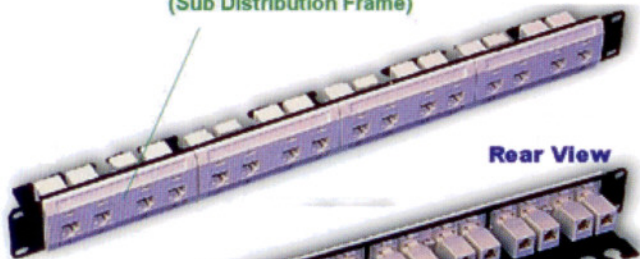

Category 5/5e Extension Coupler
